

Prospective Registry Of MultiPlex Testing

PROMPT is an online research registry for patients and families who:

- Have had multiplex genetic testing
- Have a harmful genetic change or uncertain variant which may be linked to an increased risk of cancer

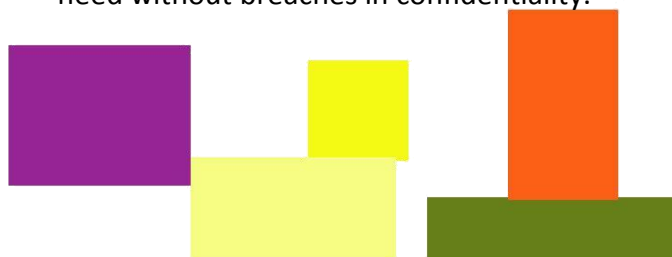

Why should I join?

By joining the PROMPT Study, you will provide critical information that helps promote scientific discoveries and deeper understanding of cancer susceptibility genes. You will also receive updates from the PROMPT study team (webinars, newsletters, emails, etc.).

How is personal information shared?

The PROMPT Study pledges to protect participant privacy. In addition, PROMPT uses sophisticated security features to ensure that physicians and researchers get the data they need without breaches in confidentiality.

What is the purpose?

PROMPT provides patients, physicians, and researchers with an opportunity to share information about multiplex genetic testing so that we can all better understand the meaning of these genetic mutations.

How do I participate?

Using a REDCap survey platform, you can enroll in PROMPT and provide data by completing questionnaires about your family and personal health histories. The survey takes approximately 20 minutes to complete. More information and the link to register can be found at: www.promptstudy.info

What is MultiPlex Testing?

MultiPlex (also known as Multi-Gene) Panel Testing is a newer form of genetic testing. These panel tests look for mutations in several different genes at once. All of the genes on the panel tests have been tied to an increased risk of cancer, but we know more about the risks associated with some of the genes than we do the others.

These genes include, but are not limited to, *ATM*, *BARD1*, *BRIP1*, *CDH1*, *CHEK2*, *PALB2*, *PTEN*, *RAD51C*, *RAD51D*, *STK11* and *TP53*.

Register for PROMPT in 3 easy steps!

- ① Log on to your computer and go to www.promptstudy.info
- ② Click on the **Register Now!** Button or request to be contacted by PROMPT.
- ③ Fill in the required information and complete the PROMPT Survey.
